

Welcome to Oddr, the legal industry's only AI-powered invoice-to-cash platform.

Your firm's net ROI with Oddr? – 1% of gross revenue

Accelerate Billing and Collections

Oddr eliminates the layers of inefficiencies across multiple, siloed systems most billers must contend with.

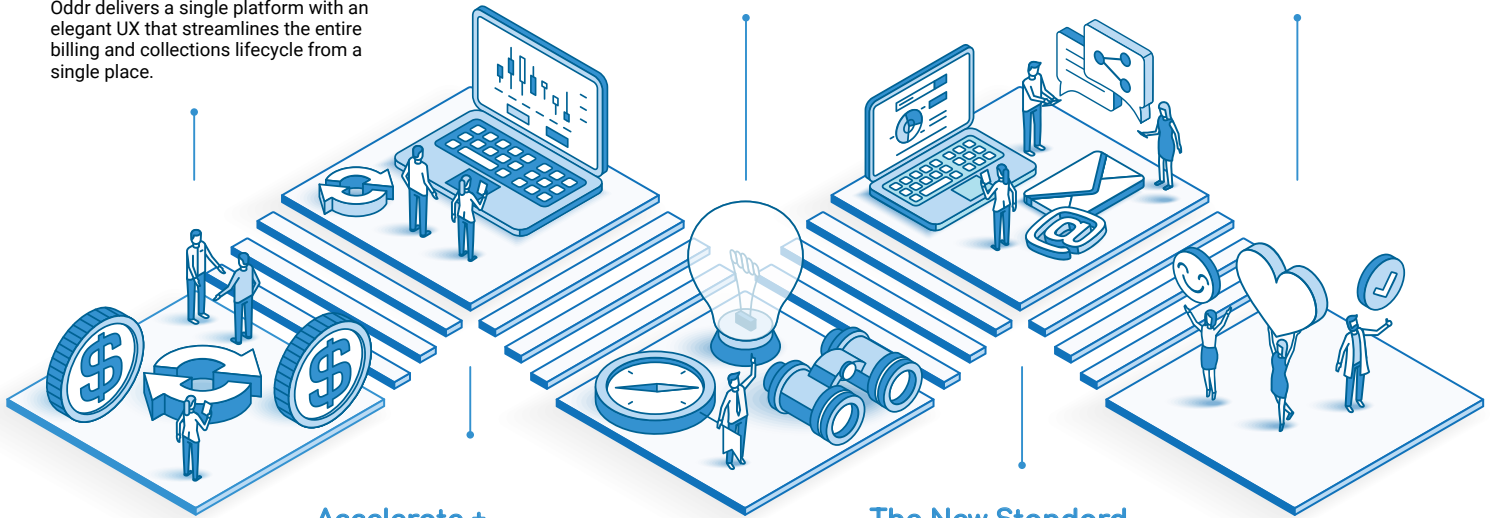

Oddr delivers a single platform with an elegant UX that streamlines the entire billing and collections lifecycle from a single place.

Eliminate Revenue Leakage

Oddr's unprecedented insights into client invoice interactions help firms identify and predict aging invoices and take corrective course earlier, eliminating write-offs as a method to accelerate payments.

An Experience Clients Love

Oddr is transforming the way your clients experience your firm's invoices for the better, including the ease of integrated 1-click payments.

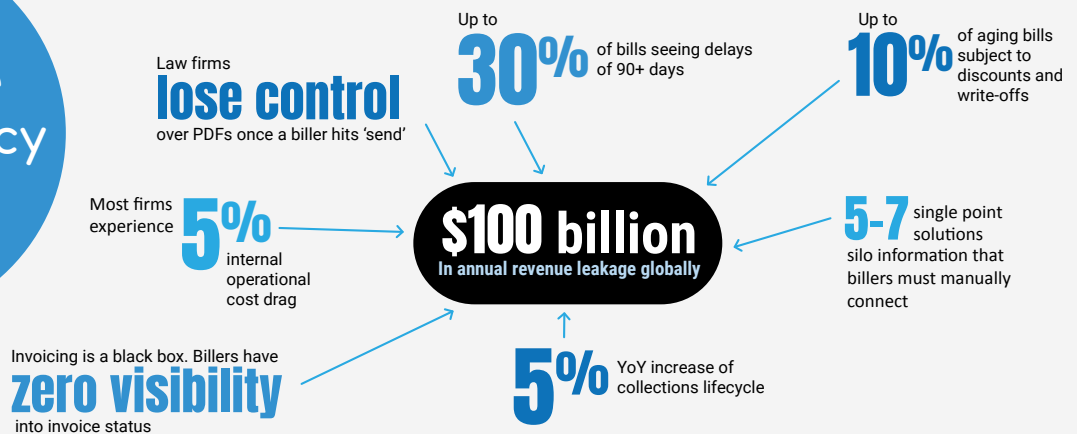

Accelerate + Predict Payment

Say goodbye to the black box of billing. Oddr helps firms get paid faster by providing unprecedented visibility and insights into client interactions with invoices, while analytics help predict behavior and payment.

The New Standard in Security

Sending PDF attachments puts sensitive client information at risk and disempowers firms from taking corrective action in cases of wrong recipient.

Oddr is setting the new gold standard in billing security that keeps client information in your control.

The Invoice to Cash Platform for Law Firms

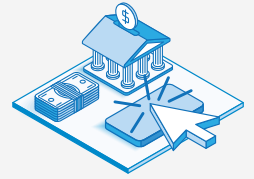

Streamlined Collections

Predictive Analytics

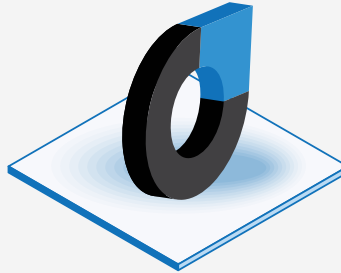

Centralized Bill Preparation

Integrated 1-click Payments

Integrated Reconciliation

Automated Bill Delivery

VORYS

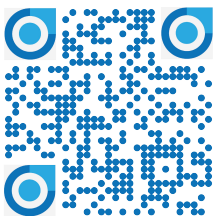

“Billing is a vital client touchpoint that is ripe for innovation. With Oddr, we are delighted to have found that innovation partner and to be offering our clients the leading edge in billing security while significantly improving this key client experience.”

William Caraher, *Director of Operations, Von Briesen*

“The fact that it’s taken this long for a solution like this to get out into the market is shocking. I can’t believe nobody has thought to do this for law firms prior to now.”

Charles Collins, *Director of IT, Ward and Smith*
